

ABHISHEK SINGH

Profile Summary

I'm a Research Analyst skilled in using Python, SQL, Excel, and tools like Power BI and Tableau to turn data into clear, actionable insights. I specialize in automating workflows, building dashboards, and maintaining clean, consistent data for teams and stakeholders. With hands-on experience in scripting and a strong interest in machine learning, I focus on solving real problems through efficient, data-driven solutions.

Skills

Programming and Libraries: Python, SQL, VBA, Google App Script, Pandas, NumPy, Scikit-learn, OpenCV, PyTorch

Data Visualization: Power BI (DAX, Power Query), Tableau, Google Sheets, Excel Dashboards, matplotlib, Seaborn

Databases & Cloud Platforms: MySQL (Joins, Indexing), Data Warehousing, AWS Stack, ETL

Development & Collaboration Tools: Microsoft Office Suite, GitHub, Gradio, Hugging Face

Work Experience

RESEARCH ANALYST – Appsquadz – Noida, IN

October 2024 - Present

- Automated cloud sales outreach workflows using **Google Apps Script**, dynamically generating personalized Gmail drafts at scale.
- Processed and structured **90,000+** business data points across 10+ industries, enabling actionable lead segmentation and analytics.
- Developed CRM-integrated automations to qualify leads via **CDN** usage, **Video Crypt** interest, and AWS service potential.
- Streamlined internal data handling using Google Sheets and automation logic to reduce manual effort and enhance reporting.

DATA RESEARCH ANALYST – SDAD Technology – Noida, IN

July 2024 - August 2024

- Leveraged advanced Excel functions (**Macros, VBA**) across 40+ data sources, improving executive reporting efficiency by **50%**.
- Designed **Tableau** dashboards to analyze 1M+ executive data points, driving data-backed strategic decisions.
- Streamlined reporting with **VBA Programming**, cutting processing time by 40% and boosting accuracy.
- Generated market analysis reports using **Excel Pivot Tables**, identifying trends across 15+ industry segments.

Projects

RESUME RANKER AI– Personal Project – Python, Gradio, Sentence Transformers, scikit-learn, Matplotlib

March 2025

- Created a tool that matches resumes to job descriptions using **NLP, TF-IDF**, and **cosine similarity**. Integrated Sentence, Transformers to analyze text semantically, and deployed a Gradio-based interface for usability.

Impact: Helped simulate real-world recruitment filtering; increased automation and reduced manual resume screening.

IMAGE MATCHING CHALLENGE 2025– Personal Project – PyTorch, OpenCV, ResNet18, Gradio, Pandas

Jan 2025

- Developed a contrastive learning model using **PyTorch** and **ResNet18** to compute image similarity. Trained the model on labeled datasets, and deployed it with a **Gradio UI** for real-time predictions.

Impact: Showcased end-to-end DL deployment and model performance tuning on vision data.

BLINKIT POWER BI DASHBOARD – Personal Project – Power BI, DAX, SQL, ETL

July 2024

- Built an interactive **Power BI** dashboard for analyzing Blinkit's monthly sales data. Automated **ETL**, defined **DAX** measures for key metrics, and implemented drill-through filters.

Impact: Enabled real-time tracking and reduced report turnaround by 70%.

Relevant Coursework

Google Data Analytics
Machine and Deep Learning

AWS Cloud Practitioner (Pursuing)
Database Management System

Data Visualization Power BI
MATLAB from MathWorks

Education

BUNDELKHAND INSTITUTE OF ENGINEERING AND TECHNOLOGY– Jhansi, U.P.

Dec 2020 – July 2024

Bachelors of Technology in Chemical Engineering (GPA: 7.9/10.0)

ANGELS PUBLIC SCHOOL– Vasundhra Enclave, New Delhi

Apr 2018– May 2019

Senior Secondary Education (GPA: 8.54/10.0)
